Re: Closure Plan for General Electric, Bldg. 1
510 E. Agency Rd., West Burlington, IA
EPA ID No. IAD005272703

Dear Mr. Boehm:

A review of our files indicates that your facility has submitted, or will soon be submitting, a closure plan to the U. S. Environmental Protection Agency (EPA) for review and approval, in accordance with Title 40 Code of Federal Regulations (CFR) Parts 264/265 Subpart G. Due to the large number of plans which have been submitted to EPA for review, we have to date been unable to review your plan. However, we will be scheduling your closure plan for review, as soon as possible.

The purpose of this letter is to determine if, in the interim, there is any interest on your part in attending a workshop conducted by the EPA Resource Conservation and Recovery Act (RCRA) staff on closure plan requirements. The presentation will focus on closure plans for hazardous waste storage tanks and container storage areas. You will be provided with information about the items of information which must be included in a closure plan in order for EPA to be able to approve the plan. Common closure plan deficiencies will be covered. It is our goal to assist you in being able to provide an approvable closure plan, so that the plan approval process can proceed in the most expeditious manner possible.

The workshop has been tentatively scheduled for June 1992 in the Des Moines area. Representatives from your company, as well as any representatives from the engineering consulting firm that may be assisting you in closure, are welcome to attend. The workshop will last from four to six hours. A date and location will be scheduled if sufficient interest is expressed. No registration fee will be charged.

If you would be interested in attending such a meeting, please let us know by May 27, 1992, either by responding in writing to the attention of Harriett Jones, of my staff, at the letterhead address, or by calling (913) 551-7861 and leaving a
